Summary

- Over 7 years of experience architecting scalable technical solutions and leading cross-functional teams, including 1 year of proven success driving product strategy and engineering execution as a Product Lead.
- Armed with an MS in Business Analytics and a BS in Management Information Systems, uniquely combine deep technical expertise with the ability to translate complex data insights into high-impact product features.
- Adept at bridging the gap between business stakeholders and engineering teams to transform high-level roadmaps into reliable, high-performance software that drives business growth.

Professional Experience

Shieldbase AI - Malaysia

Technical Product Lead, March 2025 - April 2026

- Led cross-functional teams across Product, Engineering, and QA, defining roadmap priorities and execution plans while maintaining delivery predictability and quality standards.
- Translated business and customer requirements into clear technical specifications, backlog items, and release plans, enabling efficient and consistent product delivery. Oversaw system design and technical decision-making, balancing scalability, performance, and long-term maintainability.
- Established collaboration processes between Engineering and QA, improving test coverage, release readiness, and reducing post-release defects.
- Worked closely with stakeholders to gather feedback and prioritize improvements that enhanced product reliability and user adoption.

AccelByte Inc - Indonesia, USA-based

Software Engineer, March 2021 - December 2024

- Led a research initiative to identify and implement strategies for reducing CDN and Storage costs, leveraging data analysis, benchmarking, and evaluating alternative providers. Ultimately, I successfully introduced an optimized solution, onboarded the new vendors, realized around 40% reduction in CDN and Storage costs, and the research was adapted to all company products. Significantly improving operational efficiency and cost savings.
- Facilitated onboarding guidance for new team members by conducting comprehensive product and team introduction, accelerating their integration and productivity within only 1 day.
- Led an initiative to automate Release and Deployment of the services by implementing Automated Release and Deployment design. As a result, it has successfully improved team productivity speed during the release train by 25%-40% and reduced manual intervention.
- Led an initiative to automate data warehouse migration script by implementing Flyway and made a sandbox environment, successfully improving Database Engineers productivity by 25%-40% and reducing manual migration errors.
- Streamlined the customer service experience by addressing inquiries promptly fostering long-term customer trust and loyalty, such as Krafton, Sony Interactive Entertainment, Striking Distance, Theorycraft, Raidbase, and Omeda.
- Developed scalable and stable backend solutions by collaborating with cross-functional teams and implementing system designs, ensuring on-time delivery of features and enhancing user satisfaction.

Agate International - Indonesia

Full-stack Programmer, September 2020 - March 2021

- Developed the backend system and its admin portal for a game, ensuring a robust and scalable infrastructure

that supported seamless gameplay and management features.

- Ensured timely delivery of the project by adhering to deadlines, coordinating with cross-functional teams, and mitigating any obstacle to maintaining the project schedule. Successfully finished the project 1 month earlier.

PT. Gria Inovasi Teknologi - Indonesia

Software Engineer, September 2019 - March 2020

- Developed backend and frontend for a national management system for the Attorney General of Indonesia using PHP Laravel and Bootstrap. Coordinated daily with stakeholders to refine requirements and delivered the system on schedule with a user-friendly interface and efficient server-side logic.

Universitas Bina Sarana Informatika - Indonesia

Lab Assistant, June 2016 - September 2016

- Assisted the lecturer with lab sessions. Guided students in programming concepts and debugging code examples. Supported learning in PHP, C/C++, and Visual Basic.

PT. Mitra Mandiri Informatika - Indonesia

Junior Programmer, April 2016 - September 2016

- Contributed to building decision support system (DSS) applications. Gained hands-on experience in programming and application architecture. Employed VB.net + Microsoft Access and PHP + MySQL technologies.

Portfolio

Azure Cloud Predictive Analysis • AI-Neuroscience: EEG-Based Parkinson's Disease Classification • Heart Disease Analysis • Dirty IMDb Top 1000 Movies Data Cleaning With LLM Gemini • Eye Health Analysis and Machine Learning Models Selection • and See more portfolios: <http://fajarlaksono.github.io/pro>

Technology Experience

- **AI & Agentic Systems:** CrewAI, LangChain, LiteLLM, mem0ai, ollama, OpenCode, OpenClaude, Hugging Face Transformers, Sentence Transformers, MiniLM.
- **Data Architecture & ETL:** Databricks, Snowflake, DuckDB, Kafka Connect, Apache Airflow, Milvus, Vector PostgreSQL (pgvector), MySQL, MongoDB, Elasticsearch, Redis
- **Software Engineering:** Go, Python, C/C++, C#, Spring Boot, FastAPI, Next.js, Laravel.
- **Data Science & Machine Learning:** PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, PyArrow, Joblib.
- **Cloud, DevOps & IaC:** AWS, GCP, Azure, Docker, Kubernetes, Terraform, GitHub/GitLab CI/CD, Makefile.
- **Data Visualization & XAI:** Power BI, Looker, Grafana, Jupyter Notebook, Seaborn, Matplotlib, SHAP.
- **Product & Design Collaboration:** Figma, Jira, Linear, Confluence, Miro.

Education

Master of Business Analytics, Universiti Sains Malaysia, Malaysia. 2024-2026

- GPA: 3.58/4.00.
- Relevant Coursework: Data Programming, Predictive Analytics for Business, Machine Learning, and Economic and Management Insight.
- Organization Involvement: AI Trainer in Indonesian Students Association
- Research: Predictive Analysis of Cloud Resource Utilization and Cost Optimization Using Machine Learning on Azure VM Traces (2026)

Bachelor of Information System Management, Universitas Bina Sarana Informatika, Indonesia. 2015-2019

- GPA: 3.79/4.00.
- Relevant Coursework: Databases and Data Structures, Software Engineering, and Project Management.
- Organization Involvement: Leader and Teacher in Programming and Animation Forum
- Publications: Analysis of YouTube User Satisfaction as an Educational Medium Using the DeLone and McLean Model (2019), • Learning Management System Web-Based Application for Computer Science (2018).
